

CONTINUOUS AND UNINTERRUPTED FAMILY PRESENCE IN THE NICU

NICUs are vital in providing critical care to babies requiring specialized medical care due to various health conditions. Amidst the delicate balance of embedding medical intervention within nurturance, recognizing the profound impact of a parent's presence and active participation in caring for their babies is imperative.

CONTINUOUS AND UNINTERRUPTED FAMILY PRESENCE IN THE NICU

— “ —

A NICU mother is a postpartum mother, and as such, we wholeheartedly support initiatives that promote increased, uninterrupted parental presence and dedicated bonding time during the crucial period.

CONTINUOUS AND UNINTERRUPTED FAMILY PRESENCE IN THE NICU

— “ —

As a NICU nurse of 24 years, I have seen first hand the positive impact of parents' presence at the bedside. ALL parents want what is best for their baby. Continuous presence at the bedside allows for better understanding of care and allows parents to be their baby's very best advocate.

CONTINUOUS AND UNINTERRUPTED FAMILY PRESENCE IN THE NICU

— “ —

This position paper is important to me to ensure that families in the NICU have the most ideal experience possible. Many parents in the NICU express not feeling like a parent because of all that is stripped away from them when their child is in the NICU and while we can't change all of that, it should be our mission to change as much as we can and support parents in having a close, connected, and involved relationship with their infant, especially while in the NICU.
